

BEXXAR[®]

Tositumomab and Iodine I-131 Tositumomab
For Injection

The BEXXAR[®] therapeutic regimen (Tositumomab and Iodine I-131 Tositumomab) is indicated for the treatment of patients with CD20 antigen-expressing, relapsed or refractory, low grade, follicular, or transformed non-Hodgkin's lymphoma, including patients with Rituximab-refractory non-Hodgkin's lymphoma.

Patient specific doses are prepared by board certified nuclear pharmacists, and delivered directly to your department ready for administration. Radiopharmacy also stocks all the necessary supplies for performing BEXXAR[®] therapy (including thyroid blocking medications). Our pharmacists are always available to answer questions and help with anything you may need. Just one phone call can get you started.
